TKH FUSION

A camera for real-time elevated temperature detection

DESCRIPTION

The TKH Fusion is an elevated temperature detection kit which detects, from a distance, whether a person has a higher than normal body temperature. The TKH Security elevated temperature detection kit consists of a dual spectrum smart IP-camera and a black-body. The dual spectrum camera is fitted with a thermal sensor, based on an uncooled microbolometer, to measure temperatures and a high-grade full-HD optical sensor to view the captured images. The camera is fully ONVIF Profile S compliant for interoperability with TKH Sense or other 3rd party VMS systems.

FEATURES

Dual spectrum IP-camera Accurate black-body for calibration High Accuracy up to 0.3 °C Detection distance 3 to 5 m None intrusive, none contact temperature measurement Built-in detection algorithms Smart face/body detection Compact aesthetic design ONVIF profile S and G compliant
